- 20. Fair Value Measurements

The Company's financial assets measured at fair value include bonds valued at the lower of cost or fair value when reported at fair value at the balance sheet date.

Fair value is defined as the price at which an asset could be exchanged in an orderly transaction between market participants at the balance sheet date. The Company's financial assets have been classified based upon a hierarchy defined by SAP. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a financial asset or liability carried at fair value would be classified in Level 3 if unobservable inputs were significant to the instrument's fair value, even though the measurement may be derived using inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

The Company estimates fair values using prices from third parties or internal pricing methods. Fair value estimates received from third-party pricing services are based on reported trade activity and quoted market prices when available, and other market information that a market participant may use to estimate fair value. The internal pricing methods are performed by the Company's investment professionals and generally involve using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality, as well as other qualitative factors. In instances where there is little or no market activity for the same or similar instruments, the fair value is estimated using methods, models, and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price. These valuation techniques involve some level of estimation and judgment that becomes significant with increasingly complex instruments or pricing models.

Fair Value Measurements at Reporting Date

The following table provides information about the Company's financial assets carried at fair value as of June 30, 2015. The Company had no bonds reported at fair value in the financial statements as of December 31, 2014.

June 30, 2015				
	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	
Financial Assets at Fair Value	(Level 1)	(Level 2)	(Level 3)	Total
Bonds - Industrial and miscellaneous	\$ -	\$ 2,705,934	\$ -	\$ 2,705,934

Level 1 Financial Assets

Inputs for instruments classified in Level 1 include unadjusted quoted prices for identical assets in active markets accessible at the measurement date. Active markets provide pricing data for trades occurring at least weekly and include exchanges and dealer markets.

Level 2 Financial Assets

Inputs for instruments classified in Level 2 include quoted prices for similar assets in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are market observable or can be corroborated by market data for the term of the instrument. Such other inputs include market interest rates and

NOTES TO FINANCIAL STATEMENTS

volatilities, spreads and yield curves. An instrument is classified in Level 2 if the Company determines that unobservable inputs are insignificant. Level 2 assets primarily include corporate bonds valued using recent trades of similar securities or pricing models that discount future cash flows at estimated market interest rates.

Level 3 Financial Assets

Certain inputs for instruments classified in Level 3 are unobservable (supported by little or no market activity) and significant to their resulting fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

 - D. Medical loss ratio rebates required pursuant to the Public Health Service Act

On January 1, 2014, the Company became subject to the minimum loss ratio rebate provisions of the Patient Protection and Affordable Care Act (PPACA). PPACA will require payment of premium rebates to customers covered under the Company's comprehensive medical insurance if certain annual minimum medical loss ratios are not met. At the close of each quarter, the Company will record its rebate accrual based on year-to-date estimated medical loss ratios calculated as prescribed by the interim final rule issued by the Department of Health & Human Services using year-to-date premium and claim information by state and market segment. Since this accrual reflects the amount of rebate that would be payable based on year-to-date estimated medical loss ratios, the amount of rebate will fluctuate as actual claim experience develops each calendar quarter.

As of June 30, 2015, \$717,247 was accrued.

- E. Risk-Sharing Provisions of the Affordable Care Act (ACA) the Company does not write business subject to the Risk Sharing Provisions of the Affordable Care Act.
- 25. Change in Incurred Losses and Loss Adjustment Expenses

The liability for claims unpaid as of June 30, 2015 was \$134,709,867. During 2015, \$100,929,937 has been paid on these liabilities. Reserves remaining for prior years are now \$6,133,886, as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been a favorable prior year development of \$27,646,044 since December 31, 2014. This release is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims.

At June 30, 2015 and December 31, 2014, the Company had liabilities of \$4,042,644 and \$45,227,461, respectively, related to premium deficiency reserves on its Medicaid business.
